---

## PROFESSIONAL SUMMARY

---

AI/ML Developer with hands-on experience building and deploying production LLM applications, RAG systems, and custom AI pipelines. Experienced in fine-tuning open-source language models, deploying scalable inference infrastructure, and developing enterprise AI solutions using Docker, LiteLLM, LangFuse, and modern MLOps practices. Passionate about building reliable AI products from research to production.

---

## PROFESSIONAL EXPERIENCE

---

**eDOT Solutions, AI Developer** 04/2025 – Present

- Built and deployed **production-grade RAG and Contextual RAG** pipelines using vector databases and hybrid retrieval.
- Developed scalable LLM infrastructure using **vLLM, LiteLLM Proxy, FastAPI, Docker**, and GPU-based deployment.
- Fine-tuned and pretrained open-source LLMs using **Unsloth, LoRA, QLoRA**, and **dLLM**, working with **Qwen, LLaDA, Diffusion Gemma and Gemma**.
- Built **OCR, Vision-Language**, and **YOLO**-based computer vision solutions for real-world document understanding and object detection.
- Optimized model inference through **quantization, GPU optimization**, and high-throughput serving for production workloads.
- Integrated **LangFuse** for LLM observability, prompt evaluation, and performance monitoring.
- Developed AI APIs and backend services using **Python** and **FastAPI** for enterprise AI applications.

**Persistent Systems Ltd., Student Intern** 07/2024 – 09/2024

- **Developed and maintained web applications** using **Node.js, React, Next.js, and Tailwind CSS**, including a **responsive booking site**.
- **Gained hands-on experience in professional software development**, actively contributing to team goals

---

## EDUCATION

---

**BE(Information technology), PCCE** 2021 – 2025

- **Academic Achievement:** Secured an overall **CGPA of 8.7**.
- **Practical Experience:** Actively participated in multiple **AI and Web development hackathons**.

**HSSC, Deepvihar higher secondary school** 2019 – 2021

**Percentage:66%**  
Won multiple awards in **project-making competitions**  
Active member of **science club**

**SSC, Vidya mandir secondary school** 2009 – 2019

**percentage:70%**  
Leader of **chess team** for **2 years**  
Active member of **science club**

---

## SKILLS

---

**Programming Languages:** (Python, SQL, C++, JavaScript, TypeScript), **LLM Serving & MLOps** (vLLM, LiteLLM Proxy, LangFuse, FastAPI, Docker, REST APIs, Linux, GPU Optimization, Model Quantization), **AI / Machine Learning** (PyTorch, Hugging Face Transformers, LangChain, RAG, Contextual RAG, Prompt Engineering, LoRA, QLoRA, Unsloth, dLLM, Model Fine-tuning, LLM Pretraining), **Computer Vision** (YOLO, OCR, Vision-Language Models (VLMs), Object Detection, Image Processing), **Databases** (FAISS, Pinecone, PostgreSQL, MongoDB, MySQL, Qdrant), **Agentic Systems** (Agentic AI, Multi-Agent Systems, Autonomous AI Agents, Tool Use / Function Calling), **Data Science** (Pandas, NumPy, scikit-learn), **Cloud / Deployment** (AWS, GCP, Azure), **CI/CD & DevOps** (Jenkins, GitHub Actions, Azure DevOps)

---

## PROJECTS

---

### AI-Powered Courtroom Simulation, *Final Year Project*

- Developed an **LLM-powered virtual courtroom** using **Gemini** and a fine-tuned **Mistral 7B** model to detect misinformation on social media.
- Designed a **multi-agent system** with lawyer and judge agents, leveraging real-time web search and **RAG** with **FAISS/Pinecone** for evidence retrieval.
- Built the backend using **Flask** and the frontend using **Expo**, delivering an interactive AI-powered application.
- **Research work based on this project was published in an IEEE conference/publication.**

### Medilens (Flask,Flutter) , *Hackathon*

- Developed **Medilens**, a **Flutter** and **Flask**-based mobile app for **medicine identification and information retrieval**.
- Users can **photograph medicines** to get details on **side effects, uses, and other relevant information**.
- **Fine-tuned Gemini** was used to fetch accurate **side effects, uses, and other relevant medicine details**.
- Showcased expertise in **cross-platform mobile development** and **backend integration** for a seamless user experience.

### DataDashBot for Ecommerce & MediMentor for Healthcare, *Won 2nd place*

- Developed AI chatbots: **DataDashBot** for E-commerce and **MediMentor** for Healthcare during a hackathon.
- Played a key role in **design and implementation**, enhancing **customer engagement** and **healthcare delivery**.
- Utilized a **fine-tuned GPT model** and directly integrated its **API** for chatbot functionalities.
- Secured **2nd place**, demonstrating **innovation, technical excellence, and problem-solving skills**.

### Fake News Detection In Social Media(Flutter,Flask) , *24 Hours hackathon*

- Secured **2nd place at GEC Hackathon** with the "Fab-Four" team.
- Developed an Android Fact-Checking App using **Flutter, Flask**, and **machine learning**.
- Recognized for innovation and effectiveness under pressure.

### BSRTC (Bihar State Road Transport Corporation) project , *Freelancing Project*

- Developed **BSRTC Bus Booking Platform** using the **MERN stack** for online ticket booking.
- Built a **customizable admin panel** for managing routes, schedules, and bookings.
- Successfully deployed a **live system**, ensuring a seamless booking experience.

---

## PUBLICATIONS

---

### Application for Identifying False Information in Social Media Chats

*2025 International Conference on Modeling, Simulation & Intelligent Computing (MoSiCom), IEEE Xplore*

**Published:** March 2026 | **DOI:** 10.1109/MoSiCom67259.2025.11398314
